A note from Dr. Newell:

I am board certified as a Physiatrist by the American Academy of Physical Medicine and Rehabilitation. I am also fellowship trained in X-Ray guided and Ultrasound guided interventional techniques. I offer a wide variety of non-surgical interventional procedures for both the diagnosis and treatment of neck, back and joint pain.

My undergraduate training in mechanical engineering gives me a unique outlook into the mechanics of the human body and thus the root causes of many of my patients' complaints. Additionally, I have been an avid competitive rower for many years, and I am reminded every day how important strong, functional, pain-free motion is to every part of our lives.

I take a multidisciplinary approach to helping my patients overcome pain and musculoskeletal complaints, improve overall function, and get more out of life.

I look forward to meeting with you.
