### ***A note from Dr. Newcomb:***

As a board certified (ABPS) Doctor of Podiatric Medicine, my focus is on the surgical and nonsurgical treatment of the foot and ankle of patients of all ages. The majority of foot problems can be solved conservatively but some may require surgery. My goal is to keep you walking, moving and active. Aspects of my practice include:

- Bunion and hammer toe surgery
- Fracture care
- Running and sports injuries
- Heel pain
- Diabetic foot care, ulcer treatment, and nail diseases
- Custom orthotics and ankle braces

I am a graduate of Sanford School in Hockessin, Bucknell University and Temple University School of Podiatric Medicine. After residency at Virtua Hospital in New Jersey, I returned to Delaware and began my podiatric practice in 2001.

In my free time, I enjoy spending time with my family, coaching my daughter's sports teams, hiking with our dog, and skiing.

I look forward to meeting with you and helping solve all of your foot and ankle issues.
