### ***A note from Dr. Smucker:***

My residency training was done in the busiest trauma center in northern New Jersey. So naturally when I came out in to practice, fracture care was second nature to me. After completing my residency training I returned to Delaware and went into solo practice. However, it wasn't until after a few years in practice that I realized that I wanted to be more specialized in Hip and Knee replacements. I worked for three years in southern Delaware before I returned to New York City to do one more year of advanced training in hip and knee replacements. I returned to this area in 2007 to join the staffs of Christiana Care and Jennersville Regional Hospitals.

My two primary areas of interest are hip and knee reconstruction and the complex care of fracture patients.

My specialty training allows me to offer primary hip and knee replacements, including direct anterior total hip replacments. I also perform complex revision surgeries for both hips and knees. More limited surgeries such as partial knee replacements are also available.

I look forward to being involved in your care.

### ***Education***

---

- University of Delaware B.S. in Chemistry with honors
- Johns Hopkins University M.A. in Molecular Biology
- Medical Degree at Columbia College of Physicians and Surgeons
- Orthopaedic Residency UMDNJ-Newark, NJ
